PROFILE DESCRIPTION

Currently, I am a student of **Politeknik Negeri Jakarta,** Information Technology (IT) study program. I create websites and android apps with my friends. I normally work as a team, but I can also work indepedently when I have to. I am quite familiar with HTML, PHP, Java (specifically for Android Studio), and CSS. Laravel and Codeigniter are the two frameworks that I am most familiar with. Additionally, I believe that I have substantial experience with Adobe Photoshop and Adobe Illustrator. I like designing and drawing illustrations either when I have the time to do so or when I have to. Plus, I read, watch, and listen almost everything from the internet in English, therefore I am pretty confident to say that I am really fluent in English.

SKILLS & EXPERTISE

Language mastery
